NEW
The Edinburgh History of the Greeks, 1774 to 1909
The Long Nineteenth Century
Thomas W. Gallant, University of California, San Diego
Traces the rich social, cultural, economic and political history of the Greeks

Often referred to as the ‘long nineteenth century’, this period in Greek history conventionally begins with the war of independence in 1821. However, this book adopts a broader geographical scope, encompassing the Greeks of Russia and of the Ottoman Empire, and covers a longer period. As well as looking at identity and migration, this volume examines some key themes that were especially important in shaping the development of Greek culture during the 19th century, including the impact of the formation of the nation-state, the formation of multi-tiered, multinational social structure, and the development of a transnational Greek culture.

NEW IN PAPERBACK
The Edinburgh History of the Greeks, c. 500 to 1050
The Early Middle Ages
Florin Curta, University of Florida

A new approach to the history of Greece during the Middle ages
‘This very learned and detailed investigation represents an advance in the field … There is no comparable book.’
American Historical Review

This book is the first comprehensive treatment of the economic and social history of Greece during the early Middle Ages. From the collapse of the urban economy in the early 7th century to the beginning of prosperity during the first half of the 11th century, it examines the crucial transformations taking place in Greece during the ‘Dark Ages’ and the Middle Byzantine period. Florin Curta adopts a wide-ranging approach which highlights the similarities and differences in the archaeological evidence associated with a range of social and ethnic groups, whose identities were much more fluid than previously imagined.

FORTHCOMING
The Edinburgh History of the Greeks, 1453 to 1774
The Ottoman Empire
Molly Greene, Princeton University

Interprets recent Greek scholarship on the period and makes it accessible to a wider audience

Long reviled as 400 years of unrelieved slavery and barbarity – the Turkish yoke – a new generation of scholars is rejecting this monochromatic view in favour of a more nuanced picture of the Greek experience in the Ottoman Empire.

Four main themes provide the foundation for the book and run through the individual chapters: the fate of the 1,000-year Byzantine heritage; the millet system and Ottoman society; the connections between the Greek population and other members of Ottoman society, especially in cultural life; and, the Greeks and Europe.

Defining Greek Narrative
Edited by Douglas Cairns, University of Edinburgh & Ruth Scodel, University of Michigan

Examines what is distinct, what is shared and what is universal in Greek narrative tradition

The ‘Classic’ narratology that has been widely applied to classical texts is aimed at a universal taxonomy for describing narratives. More recently, ‘new narratologies’ have begun linking the formal characteristics of narrative to their historical and ideological contexts. This volume attempts such a rethinking for Greek literature. It has two closely related objectives: to define what is characteristically Greek in Greek narratives of different periods and genres, and to see how narrative techniques and concerns develop over time.

Courts and Elites in the Hellenistic Empires
The Near East After the Achaemenids, c. 330 to 30 BCE
Rolf Strootman, University of Utrecht

The first complete study of royal courts in the post-Achaemenid Near East

Rolf Strootman brings together aspects of court culture in the Macedonian empires of the Seleukids, Antigonids and Ptolemies during the Hellenistic Period. He shows how Alexander the Great and his successors reshaped their Persian and Greco-Macedonian legacies to create a new kind of rulership that was neither ‘western’ nor ‘eastern’ and would profoundly influence the later development of court culture and monarchy in both the Roman West and Iranian East. Drawing on the socio-political models of Norbert Elias and Charles Tilly, Strootman demonstrates how the Hellenistic dynastic courts were instrumental in the integration of local elites in the empires, and the (re)distribution of power, wealth, and status. He analyses the competition among courtiers for royal favour and the, not always successful, attempts of the Hellenistic rulers to use these struggles to their own advantage.

Rome and the Mediterranean 290 to 146 BC
The Imperial Republic
Nathan Rosenstein, Ohio State University
Rome’s stunning rise to mastery of the ancient Mediterranean
Nathan Rosenstein describes the Republic’s great wars – against Pyrrhus, Carthage and Hannibal, and the kings of Macedon and Syria – as well as its subjugation of Gallic northern Italy and Spain. He reveals why and shows how Rome engaged in war so frequently and analyses the operation of the Roman army on campaign and in combat.

The End of the Roman Republic 146 to 44 BC
Conquest and Crisis
Catherine Steel, University of Glasgow
A crucial and turbulent century for the Roman Republic
In the century following 146 BC, Rome consolidated its power into an immense territorial empire. At the same time, the internal balance of power shifted dramatically, a process which culminated in the civil war between Pompey and Caesar and the re-establishment of monarchy. Catherine Steel focuses on the issues of freedom, honour, power, greed and ambition, and the cherished but abused institutions of the Republic which were central to events.

**Imperial Rome AD 193 to 284**
*The Critical Century*
Clifford Ando, University of Chicago

Traces the history of Rome during a period of unprecedented foreign crises and religious change

‘Provides an excellent gateway to one of the most confusing and intriguing periods in Roman imperial history.’
Sehepunkte

The Roman empire during the period framed by the accession of Septimus Severus in 193 and the rise of Diocletian in 284 has conventionally been regarded as one of crisis. Between 235 and 284, at least eighteen men held the throne of the empire, for an average of less than three years, a reckoning which does not take into account all the relatives and lieutenants with whom those men shared power.

The middle of the century also witnessed catastrophic, if temporary, ruptures in the territorial integrity of the empire. Large portions of the eastern and western halves of the empire passed under the control of powers and principalities who assumed the mantle of Roman government and exercised meaningful and legitimate power over millions.

Clifford Ando describes and integrates the contrasting histories of different parts of the empire and assesses the impacts of administrative, political and religious change.

**Imperial Rome AD 284 to 363**
*The New Empire*
Jill Harries, University of St Andrews

A distinct perspective on the momentous religious change in the region

Diocletian and his principal successor, Constantine, ruled the Roman world for over half a century and Constantine’s sons built on that legacy. Administrative reform encouraged the rise of a bureaucratic culture, provincial government was reshaped and the court became more structured. The period was also one of momentous religious change. With Constantine’s adoption of Christianity.

**From Rome to Byzantium AD 363 to 565**
*The Transformation of Ancient Rome*
A. D. Lee, University of Nottingham

The transformation of the Roman world under the combined impact of Christianity and barbarian incomers

Control of the west was lost during the 5th century, and the empire’s centre of gravity had shifted irrevocably to the east, with its focal point now the city of Constantinople. At the same time Christianity became increasingly dominant in religious life, politics, society and culture. A. D. Lee charts these and other significant developments.

**Imperial Rome AD 14 to 192**
*The First Two Centuries*
Jonathan Edmondson, York University, Canada

Covers Rome and its empire from Tiberius to Commodus

Despite an uneven quality to the imperial line – including a suicide (Nero) and two assassinations (Caligula and Domitian) – this was a period of imperial consolidation and some expansion. The society and economy of Rome and its empire thrived for the most part under the twin blessings of an efficient administration and a near invincible army. Jonathan Edmondson interweaves a narrative of the main events with an analysis of the key underlying themes.

- Reveals how the evolving political relationship resulted in the redefinition of what it meant to be ‘Roman’
- Argues that power still depended largely on the personality and preferences of the emperor
- Stresses the military image of the Roman Princeps and describes continuing the military expansion

Debates and Documents in Ancient History
Series Editors: Emma Stafford, University of Leeds & Shaun Tougher, Cardiff University
www.euppublishing.com/series/ddah

This series consists of concise books on important but relatively compact themes. The books are readable and informative and stimulate an awareness of the kinds of material and documentary evidence likely to be available to the ancient historian, and the usually problematic nature of its interpretation. Each volume gathers key texts in one place, includes a glossary, bibliography and questions for consideration, and provides a guide to further reading and resources.

**NEW**

**Sex and Sexuality in Classical Athens**
James Robson, The Open University

**A broad look at the sex lives and sexual beliefs of ancient Athenians**

This book aims to make accessible the evidence for – and the controversies surrounding – the sexual behaviour and social attitudes of classical Athenians. Key areas such as marriage, same-sex relationships, prostitution, sexual fantasy, rape, adultery and sexual attraction are dealt with in chapters which discuss the original sources, highlight their strengths and weaknesses as evidence, and consider the main scholarly approaches to them.

**King and Court in Ancient Persia (559 to 331 BC)**
Lloyd Llewellyn-Jones, University of Edinburgh

**Explores Achaemenid kingship and argues for the centrality of the royal court in elite Persian society**

‘Llewellyn-Jones blends an easy mastery of widely disparate sources with a clear-cut, jargon-free prose style.’

*London Review of Books*

The first Persian Empire (559-331 BCE) was the biggest land empire the world had seen, and seated at the heart of its vast dominions, in the south of modern-day Iran, was the person of the Great King. Hidden behind the walls of his vast palace, and surrounded by the complex rituals of court ceremonial, the Persian monarch was undisputed master of his realm, a god-like figure of awe, majesty, and mystery.

Augustus
Edited by Jonathan Edmondson, York University, Canada

A history of Rome’s first emperor and the impact of his regime

‘A valuable publication for every student interested in Roman history and in the age of Augustus.’
Bryn Mawr Classical Review

Augustus brought peace and stability to Rome after decades of strife and uncertainty, putting in place a new institutional framework for the Roman Empire and inspiring the ideology that sustained it for the next 300 years. The papers in this volume discuss a range of topics including: Augustus’ dramatic rise to prominence following the death of Julius Caesar in 44 BC; his policy on overseas wars; his concern to reinforce Roman religion and family life; the importance of visual imagery in developing his image as leader; and the impact of his regime on the Roman provinces.

Greek Athletics
Jason König, University of St Andrews

Exploring the past and rethinking the future of ancient sport studies

‘Provides a good introduction to how the study of ancient athletics intersects with subjects such as the influence of Greek culture on the Roman world and the importance of state-sponsored education in the life of Greek cities.’
Bryn Mawr Classical Review

Athletic training and athletic competition were key features of ancient Greek life for more than 1,000 years, from the foundation of the Olympic festival in the 8th century BC into the Roman period. This volume brings together a collection of important pieces and extracts on core themes, covering gymnasium education, festival competition and victory, the role of athletic activity in conceptions of ancient identity, and the reception of the ancient athletic heritage in the modern world.

Cladrans and Ancient History

Scottish Archaeological Journal
Edited by Ellen McAdam, Glasgow Museums

Furthers the study of the archaeology of Scotland and neighboring regions, from the earliest prehistory to the present

Published for the Glasgow Archeological Society, this journal includes a range of papers reporting on fieldwork, museum collections and the social and intellectual context of Scottish archaeology.

Two issues per year
ISSN: 1471-5767 eISSN: 1755-2028

NEW IN PAPERBACK

New Frontiers
Law and Society in the Roman World
Paul du Plessis, Senior Lecturer, School of Law, University of Edinburgh

An interdisciplinary, edited collection on social science methodologies for approaching Roman legal sources

Roman law as a field of study is rapidly evolving to reflect new perspectives and approaches in research. Scholars who work on the subject are increasingly being asked to conduct research in an interdisciplinary manner whereby Roman law is not merely seen as a set of abstract concepts devoid of any background, but as a body of law which operated in a specific social, economic and cultural context. This ‘context based’ approach to the study of Roman law is an exciting new field which legal historians must address.

Key Features
• Contributes to the debate on the interface between legal history and ancient history
• Focuses on larger emerging themes such as the interaction between legal theory and practice, Roman legal thought, and law and economics
• Brings together a distinguished group of scholars who provide different perspectives
